

## **DVS REPORT**

## – Description-

"DVS Report" Software provides generating of the HTML-report, based on data, which acquired during the survey with DVS Software. As a result of software functioning we get a report in the form of collection of HTML-pages, images, video clips for each recorded object, text files with telemetry data for each object.

"Sea Software Packages and Technologies" Ltd. office 510, Krasnogvardeyskava st, 38, Gelendzhik, Russia, 353460, +7(86141)99771, http://www.mpkit.ru

This report could be looked with any web-browser.

The main report file is index.html.

We have an opportunity to generate a web-site, based on our report.

User doesn't take part in report forming. This means that user must enter only common information about report and set up necessary properties. After the process is started program will work in automatic mode, and when the process is finished, we obtain a fully prepared report.

## Features

- Automatic report generation from the data recorded by DVS software.
- Creating a set of stills in JPEG format.
- Creating video clips for each camera in AVI format.
- Creating text files with tabulated telemetry data.
- Viewing result report with any web-browser.
- It is possible to build a web-site based on report data and available via LAN or Internet.

## Minimal System Requirements.

CPU	Intel Celeron 667 MHz
RAM	256 MB
HDD	HDD capacity depends on DVS project volume
Operating System	Microsoft Windows XP
DirectX	DirectX 8.0 and higher
